53462 Current studies in Geoecology 1CP
(O. Heiri, S. Von Fumetti)

Datum	Referent	Titel
15.03	Sara Amsler	Use of beneficial insects against aphids in stone fruit orchards
22.03	Tobias Thommen/ Emanuel Glauser	Composition of highly diverse diatom community shifts as response to climate change Ecological status of the river Bünz (AG) 15 years after restoration
29.03	Noe Schmidhauser	Human impact/holocene climate reconstruction inferred from fossil chironomids and other macroinvertebrates fossils of lake Zminje Jezero (Montenegro)
05.04	Andri Bandli	Life at the extreme: high alpine springs and glacial outflows in the UNESCO region Jungfrau-Aletsch
12.04	Marlen Ursella	Change of freshwater spring microbial functional diversity along environmental gradients
19.04	Simona Breu/ Silja Oelrichs	Can fossil assemblages of aquatic invertebrates be used as a proxy for water depth? Distinction of forest and open land springs in the Black Forest Biosphere Reserve
10.05	Eliane Hofstetter	Development of an educational trail to springs in the Samnaun region (GR)
17.05	Allison Dwileski	Holocene vegetation change in the eastern Swiss Alps: Effects of climate and early human impact
24.05	Loris Rechsteiner	The occurrence of vascular plants on the steep cliffs around Furka pass
31.05	Clara Du'Pasquier/ David Geiser	Longitudinal and altitudinal zonation of natural spring systems around Crans-Montana (VS)
