

HS 2021

53462 Current studies in Geoecology 1CP
(O. Heiri, S. Von Fumetti)

Di, 11-12, Seminar room ground floor

Datum	Referent	Titel
12.10	Alicia Escher	Developing new methods for monitoring springs in the canton Bern with species detection in eDNA water samples
19.10	Joelle Pasquier	Can relict-rich communities be of an anthropogenic origin? Palaeoecological insight into conservation strategy for endangered Carpathian travertine fens
26.10	Chiara Schober	Impacts of climate change on aquatic insects in temperate alpine regions: Complementary modeling approaches applied to Swiss rivers
09.11	Julien Sentieiro	Freshwater springs in Menzenschwand in the Biosphere Reserve Black Forest – a Landscape Ecology approach
16.11	Astrid Rutzer	Effects of Azoxystrobin and elevated nutrient concentration on the key shredder <i>Gammarus fossarum</i>
23.11	Thomas Dürrenberger	Hydrogeochemistry of Black Forest springs: Insights from hydrogeochemical parameters, stable isotopes and macroinvertebrates
30.11	Noe Schmidhauser	Human impact/holocene climate reconstruction inferred from fossil chironomids and other macroinvertebrates fossils of lake Zminje Jezero (Montenegro)
07.12	Theresa Goder	Altitudinal and longitudinal zonation of spring systems in the Brugga catchment in the Black Forest
